Sheraz

Software Engineer · Full Stack Developer · Social Media Expert

PROFILE

Software Engineer and Full Stack Developer specializing in modern web development, frontend and backend solutions, digital services, social media growth, marketing strategies, and automation. Builds responsive websites, scalable APIs, and reliable databases, and pairs engineering work with hands-on digital growth strategy for clients and brands.

EXPERIENCE

Software Engineer & Full Stack Developer

3+ YEARS · ONGOING

Designing and building responsive websites, web applications, backend systems and APIs for clients across multiple industries — from planning through deployment.

Database & Backend Systems

CORE PRACTICE

Architecting and managing MySQL, SQL Server and MongoDB databases, building authentication systems, and maintaining secure, scalable server infrastructure.

Social Media & Digital Growth Consultant

PARALLEL TRACK

Delivering social media management, content strategy and audience growth campaigns, helping brands build consistent digital presence and measurable engagement.

SELECTED PROJECTS

Smart Parking Management System

Real-time slot tracking & automated billing dashboard.

University Management System

Student records, attendance & results portal.

Premium E-Commerce Website

Full storefront with cart & checkout flow.
